## **Supervisor Dianne Jacob Endorses Yes on A Campaign**

**San Diego** – Citing the endless parade of misinformation being peddled to defeat Measure A, San Diego County Supervisor Dianne Jacob today announced she endorses Yes on A.

“I have no problem with campaigning hard, but some folks against Measure A have gone too far,” said Supervisor Jacob. “I can’t sit back while outrageous and offensive claims are being made. I’m supporting Measure A because it simply ensures that voters, not five elected officials, will have the final say on County General Plan busting projects in the rural and semi-rural areas.”

Measure A is a grassroots initiative designed to give San Diego County residents a stronger voice in determining how and where housing is built in the unincorporated county. The initiative, organized by grassroots environmental and good planning advocates, requires voter approval of proposed changes to the County’s General Plan that would significantly increase residential density in fire-prone rural and semi-rural areas.
